

## AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0019] as follows:

[0019] In an alternative embodiment the frame comprises a means to secure containers in place using a locking system in order to prevent potential tampering. The locking mechanism is typically in the form of an additional thread 10 provided in the female screw portion 3. In another embodiment, the frame comprises a means to secure containers in place so that the containers are not readily removable.
